Subject: RE: COGCC Storage Field Task Group

Good Morning Everyone,

The meeting to discuss the COGCC's proposed regulations for Gas Storage Fields is scheduled for Wednesday, January 23, at 9:00 am in the COGCC Denver office. I believe the meeting should last approximately two hours. I have attached a draft copy of the proposed regulations for your review prior to the meeting. I would also recommend everyone read the comments from Blue Sky Gas Storage concerning the proposed gas storage regulations. These comments can be found under the "Rulemaking Activity" header on our internet homepage. Please invite any additional members of your individual staffs that you feel would be appropriate.

As we discussed in the last "Additional Regulations Work Group" meeting, any questions concerning preemption will be noted but not discussed in detail. Also, the gas storage field rules will not be severed from the current rule making process for separate approval. I would still like to discuss the gas storage field rules at a separate meeting, however, in order to free up additional time at the main Additional Regulations meeting.

Feel free to contact me if you have additional questions.

Sincerely,

David K. Dillon
Engineering Manager
